

CONTENTS RESTORATION FOR YOUR HOME

WHAT IS CONTENTS RESTORATION?

Contents restoration is the process of restoring valued items in your home that have been damaged in a fire, flood or other unexpected event. Most people assume that after a disaster their belongings are lost; however, with the right restoration company most personal possessions can be saved.

WHEN DISASTER STRIKES

How do you navigate the process of sifting through the contents of your home so you can get back home?

When it comes to your personal property, we come alongside you to perform the following:

- **Inventory:** Documentation is a must, especially after filing an insurance claim. Our team carefully inventories and documents items, ensuring nothing is lost in the process.
- **Cleaning and deodorization:** Contents may be affected by water, fire, soot, mold, and odor. Our experts work with you and your insurance company to determine if items can be restored to pre-loss condition. In the process, items that can't be restored to pre-loss condition are quickly identified so that plans for replacement can begin right away.

Our process involves carefully recovering and securing your residential belongings that have been damaged. We then safely transport your contents to our secure restoration facility where we clean and restore your belongings to pre-loss condition.

Our team is standing by to take your call to dispatch a certified restorer to your location immediately to sort, pack, transport, clean and restore your valuable property.

Restoration Starts Here.
